

G20 Research and Innovation Ministerial Meeting

Chair's Statement of the Brazilian Presidency

In the context of the G20 Research and Innovation Ministerial Meeting that took place in Manaus, on 18-19 September 2024, some members and other participants expressed their views on Russia and Ukraine and the situation in Gaza.

Some members and other participants considered that these issues have an impact on the global economy and should be treated in the G20, while others do not believe that the G20 is a forum to discuss these issues.

The Brazilian G20 Presidency will conduct the discussion on these issues among Sherpas in the coming months in preparation for the Rio de Janeiro Leaders' Summit.

Recalling the G20 New Delhi Leaders' Declaration, the Chair Country urged members to uplift their commitment to the strengthening of the G20 as an effective cooperation platform, based on consensus as its most important tool.
